Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Suzuki et al.
3. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McIntyre et al.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al. in view of McIntyre et al.

7. Suzuki et al. differs from the claimed invention in that Suzuki et al. does not disclose detecting a physical attribute as a means for inputting the identification code. McIntyre et al. teaches using a physical attribute or keyboard input as a means for inputting an identification code. It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to substitute physical attribute detection for the keyboard input. One would have been motivated to so modify Suzuki et al. in order to provide a more secure device.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M Gray whose telephone number is 703-308-1698. The examiner can normally be reached on M-T & T-F 7:30-6:00.
